## CHAPTER 1

### POTESTAD ADMINISTRATIVA: THE CONCEPT OF ADMINISTRATIVE PUBLIC POWER IN SPANISH LAW

EDUARDO GAMERO-CASADO

#### I. Introduction: purpose and scope of this chapter

#### II. Conceptual delimitation of the *potestad administrativa*: distinctive features

1. *Potestad is a unilateral legal power granted to satisfy the interest of third parties*
2. *Public powers (potestades públicas): concept and demarcation from private individuals. General interest and potestad administrativa*
  - 2.1. *Public "potestades" as powers conferred to satisfy the general interest*
  - 2.2. *How the general interest linked to the conferral and exercise of a "potestad administrativa" is determined*
  - 2.3. *General interest and misuse of power in the exercise of "potestades administrativas"*
  - 2.4. *Public potestad as power-duty; the unrenounceable nature of potestades administrativas*
3. *Organisational interweaving of public powers (potestades públicas) and specific analysis of some of them*
  - 3.1. *The original public powers*
  - 3.2. *Full judicial review of "potestades administrativas"*
  - 3.3. *Other public powers other than "potestades administrativas"*
4. *Exclusion of the concept: (material) provision of public services; and ancillary or support activities for the exercise of potestades administrativas*
5. *Delimitation and definition of potestad administrativa. Consequence: subjection to administrative law in its exercise*

#### III. Attributes or conceptual notes of the *potestad administrativa*: identifying features

1. *Constitutional indeterminacy. Multiformity*
2. *The potestad administrativa is a unilateral (one-sided) power, the exercise of which produces effects by itself (promptness); it is not necessarily a power of authority or imperium, which can be imposed on private individuals (enforceability). Enforceability as a specific potestad administrativa*

3. *The attribution of potestades administrativas is based on the principle of legality. The exercise of potestades administrativas without competence to do so is an invalidity defect*
4. *Exercise of potestades administrativas and administrative procedure*
  - 4.1. *The exercise of "potestades administrativas" is subjected to procedural guarantees, which vary in intensity depending on the potestad administrativa being exercised*
  - 4.2. *Substantive participation in the processing of an administrative procedure involves the exercise of "potestades administrativas"*

**IV. The exercise of *potestades administrativas* can be conferred to both public and private persons. It is necessary to differentiate between holding and exercising *potestades administrativas***

1. *Cases involving the exercise of potestades administrativas by private persons under Spanish law*
  - 1.1. *So-called "private individuals exercising public functions"*
  - 1.2. *Public law corporations*
  - 1.3. *Decisions issued by public concessionaires in the exercise of "potestades administrativas"*
  - 1.4. *Some relations between private bodies providing and private users or recipients of services of general interest*
  - 1.5. *Decisions issued by certification and accreditation private bodies*
  - 1.6. *Spanish sports federations*
  - 1.7. *The "extension" of administrative law*
  - 1.8. *Summary: law governing the exercise of potestades administrativas by private persons under private law: supervision and control; necessary distinction between holding and exercising of potestades administrativas*
2. *Exercise of potestades administrativas by public sector entities with private law legal personality*
  - 2.1. *The new legal framework of Acts 39/2015 and 40/2015*
  - 2.2. *The "escape" and "return" to administrative law. Limits*
3. *Exercise of potestades administrativas by Parliament, Judiciary and constitutional bodies*

**V. Classifications of the *potestades administrativas***

1. *The need for a catalogue or inventory of potestades administrativas. Families of procedures*
2. *Potestades administrativas favourable and potestades unfavourable or involving the exercise of public authority or imperium*
  - 2.1. *What are prerogatives, authoritative or unfavourable potestades administrativas according to scholars?*
  - 2.2. *List of functions involving unfavourable acts or the exercise of exorbitant prerogatives*
